Bitcoin Suisse

Bitcoin Suisse is the Swiss crypto-native pioneer and trusted gateway to crypto asset investing. As the leading crypto service provider in Switzerland, we operate across the most relevant crypto exchanges and provide brokerage, custody, staking and other crypto-related services at the forefront of technical innovation. We are as dedicated to our clients as we are passionate about cryptocurrencies and the underlying blockchain technology. We make things happen and have helped to shape the crypto and blockchain ecosystem in Switzerland as a driving force in the development of the 'Crypto Valley'. Bitcoin Suisse is headquartered in Zug with offices in Copenhagen, Vaduz and Bratislava and targets (ultra-) high-net-worth private individuals and institutional clients.

Frontend Engineer

As a Frontend Engineer at Bitcoin Suisse you will play an important role in developing, testing and maintaining modern web app projects. You will be working in close collaboration with product owners, designers, solution architects and project managers. Our products vary from large digital platforms to the dynamic landscape of DeFi products.

How we work

As a technological leader in the fast-paced crypto space, we are required to react quickly to the changing market demands. This is why we believe in agile project management methodologies. By continuously delivering small increments, we learn through the feedback we receive to optimize our products until they excel. While we are dynamic in spirit, we believe in our staff taking initiative to empowering themselves where they can drive impact rather than hierarchically assigned ownership.

You will have the following responsibilities

- Build and maintain our bitcoinsuisse.com website using Next.js, Typescript, GraphQL and React
- Maintain and extend our other client–facing applications and internal libraries
- Help optimize our workflows and technology stack
- Research and create prototypes to explore new ideas
- Make sure things look right across various browsers and devices
- Work together with our cross-functional team and the marketing department to define, design and deliver new features.
- Review code from other team members

What you bring along

- Solid experience in building high-quality websites using Next.js
- Bonus: Strapi CMS experience
- Fluent in TypeScript or ES6+
- Know your way around dev tools and the debugger
- Understanding of web usability standards and development best practices
- A keen eye for visual detail
- Be a team player with a strong sense of responsibility and drive
- Excellent knowledge of English in writing and speaking

What we offer

- Exciting projects in the crypto space
- A friendly and supportive team culture that relies on positivity
- Regular team events and activities
- High level of autonomy and responsibility
- Flexible organization of your working hours
- Workation: Enjoy the flexibility of working across designated EU countries, with up to 10 days a year to combine work and travel

- Sport: Multisport card
- Home office
