

Bitcoin Suisse is the Swiss crypto-native pioneer and trusted gateway to crypto asset investing. As the leading crypto financial service provider in Switzerland, we operate across the most relevant crypto exchanges and provide brokerage, custody, staking and other crypto-related services at the forefront of technical innovation. We are as dedicated to our clients as we are passionate about cryptocurrencies and the underlying blockchain technology. We make things happen and have helped to shape the crypto and blockchain ecosystem in Switzerland as a driving force in the development of the 'Crypto Valley'. Bitcoin Suisse is headquartered in Zug with offices in Copenhagen, Vaduz and Bratislava and targets (ultra-) high-net-worth private individuals and institutional clients.

Test Engineer

You will have the following responsibilities

- You will be working with testing activities related to our core banking systems, ensuring the robustness and reliability of crucial financial functionalities
- You will play a key role in our projects to identify, based on your tests cases, issues occurring from newly implemented or enlarged functionalities in our system landscape
- You work as sparring-partner for our Product Owners, Developers and architects in close collaboration
- You will consult and inform both technical teams and business stakeholders regarding test results and test cases
- Your daily tasks will include execution of functional tests, management of the test sets and documentation of the test results
- You will ensure that the functional business requirements and objectives are correctly reflected in the solutions provided by writing Acceptance Criteria, Test Cases and maintaining test-sets

What you bring along?

- Experience with IT systems in the financial sector and especially in core banking systems
- 3-5 years of experience as either (Functional) Test Engineer, Automation Tester or Requirements Engineer
- B.Sc./M.Sc. in business or computer science / engineering and knowledge in the other respective area
- Strong knowledge of Testing in an agile Software Development Processes
- We consider it an advantage if you are able to manage complex communication and negotiations from different perspectives and interests
- You are able to work both in a team and independently and engage with your colleagues, including knowledge sharing. You explain complex issues in a simple way and can independently identify and raise any issues occurring
- Excellent organizational abilities
- Excellent verbal and written communication skills in English
- Regardless of your background the right drive and passion for maintaining strong solutions and relations with the business stakeholders is at the heart of what we are looking for

What we offer

- **Expertise:** Work with crypto native experts
- **Culture:** Positive and supportive team culture that relies on common goals, ambitions and values
- **Activities:** Regular team events and activities
- **Ownership:** High level of autonomy and responsibility
- **Crypto Salary:** Option to get a part of your salary in Bitcoin and/or Ether
- **Fitness:** Sport over lunch activities
- **Location:** Office location in crypto valley right next to the train station of Zug

Please note that for this position, only direct applications with a valid working permit for Switzerland will be considered.
