Bitcoin Suisse

Bitcoin Suisse is the Swiss crypto-native pioneer and trusted gateway to crypto asset investing. As a crypto broker, we operate across the most relevant crypto exchanges and provide brokerage, custody, staking and other crypto-related services at the forefront of technical innovation. We are as dedicated to our clients as we are passionate about cryptocurrencies and the underlying blockchain technology. We make things happen and have helped to shape the crypto and blockchain ecosystem in Switzerland as a driving force in the development of the 'Crypto Valley'. Bitcoin Suisse is headquartered in Zug with offices in Copenhagen, Vaduz and Bratislava and targets (ultra-) high-net-worth private individuals and institutional clients.

Software Engineer

How we work

As a technological leader in the fast-paced crypto space, we are required to react quickly on changing market demands. Therefore, we believe in agile project management methodologies. By continuously delivering small increments, we learn through the feedback we receive to optimize our products until they excel. While we are dynamic in spirit, we believe in our staff taking initiative to empowering themselves where they can drive impact rather than hierarchically assigned ownership.

You will have the following responsibilities

- Consistent development and delivery of high-quality, low-defect, maintainable and solid code
- Work in close collaboration with your team
- Providing the required documentation
- Unit testing of your own code
- Taking responsibility of the systems you are working on which includes troubleshooting
- Create enterprise/banking-grade business applications which provide value to our various internal and to our thousands of external stakeholders
- Serve as a subject matter expert for everything in your domain (skillset and systems)

What you bring along

- Professional experience in the field of software development
- .NET, C#, Azure, SQL, Web, REST APIs and Microservices
- ReactJS, TypeScript, HTML/CSS/JavaScript
- Understanding of Blockchain and cryptography will be a plus
- Good understanding of Design Patterns, SOLID code, and principles
- You like to work in a team and as well independently and engage with your colleagues
- You explain complex issues in a simple way and are motivated by helping your colleagues.
- Good English is a must

What we offer

- Exciting projects in the crypto space
- A friendly and supportive team culture that relies on positivity
- Regular team events and activities
- High level of autonomy and responsibility
- Flexible organization of your working hours
